

ECIS 2015 - Call for Papers

26-29 MAY 2015 MÜNSTER, GERMANY

Important Dates

Submissions open: October 6, 2014
Submission deadline: November 28, 2014 (strict and only deadline!)
Notification of acceptance: End of February, 2015

The Networked Society

Modern society is a networked society permeated by information technology (IT), defining ECIS 2015's Conference Theme.

Networks, perceived as a group of organisations and people connected on several aspects who exchange information, contacts, and experience for professional or social purposes, leave their mark on almost every area of our society and promise diverse advantages to those involved.

From a technical perspective, enormous amounts of information can be communicated to a larger number of recipients faster than ever before. The evolution of networks is heavily influenced by the extensive use of Information Systems, which has enabled co-evolving advanced quantitative and qualitative forms of networking.

ECIS 2015 should be a meeting place for European and also non-European researchers in the field of Information Systems from various cultures and countries and should reflect the specific and innovative research in information systems dealing with the overarching networked society.

We are happy to welcoming you to Münster, one of the cradles of IS research and education in Germany!

Tracks

We invite you to submit your paper to one of the conference tracks:

- The Networked Society (Theme Track)
- Big Data
- Decision Support
- Business Analytics and Knowledge Management
- Business Process Management
- Cloud Computing Services
- Social Media Research and Analytics
- Economics and Value of IS
- Economics behind Societal and Industrial Transformation through IS
- Enterprise Modeling
- Enterprise Systems Crossing Organizational Boundaries
- Enterprise Transformation - Purposeful design or organic emergence?
- Sociotechnical Approaches to Organizational Learning and Change
- IS Adoption and Diffusion
- IS Development
- Methods, Tools and Human Factors in IS/IT Management
- Service Innovation, Engineering, and Management
- Business Models
- Advancing Theories and Theorizing in IS Research
- Human-centred Information Systems
- Sustainably Digital
- Digital Health Initiatives
- Openness and IT
- Diversity and Inclusion in the IT workforce
- Supply Chain Management in Volatile and Uncertain Environments
- Digitization in the Public Sector
- Accounting Information Systems
- Media Management and Information Systems
- IS Teaching Cases
- IS Strategy and Governance
- Security and Privacy of Information and IS

ECIS 2015 - Call for Papers

26-29 MAY 2015 MÜNSTER, GERMANY

Format

Papers for ECIS 2015 cover all aspects of information systems, broadly defined, and may take the form of completed research papers and research-in-progress.

Research papers should document established results and be presented according to the highest academic standards.

Research-in-progress may address work still under development; academic rigor is, however, still expected.

Research papers, research-in-progress, and teaching cases will be published in the ECIS conference proceedings and made available in the AIS eLibrary (aisel.aisnet.org/ecis/).

Research papers and teaching cases will be presented in interactive conference track sessions.

Research-in-progress papers will be presented in a session specifically designed to allow interaction between authors and their interested colleagues.

Guidelines

Please go to the conference website www.ecis2015.eu/participation/submissions for author guidelines. There, a Word document template and LaTeX document template are available that will simplify the layout of your submission.

Besides the conference there will also be a Doctoral Consortium, Panels, Workshops, Affiliated events and Social Events.

To organize a workshop or affiliated event, please check the separate [call for workshops](#) on the ECIS 2015 website. Please monitor our website and do not forget to have a look at the [important dates page](#).

Submission

Authors should submit to the track that best fits the research. Research papers and research-in-progress papers are limited to 12 and 7 pages in length respectively. Teaching cases can be up to 14 pages long.

All submissions must use the Word or the LaTeX template on the website and be submitted as PDF.

Submissions to ECIS 2015 must be original and must NOT already have been published previously in a journal or conference proceedings, nor presented at another conference.

Moreover, they must NOT be currently under consideration for publication or presentation elsewhere.

Note that a person can be (co)author of NO more than 3 submissions to ECIS 2015 to assure diversity at the conference.

Copyright

Copyright for all papers resides with the authors.

By submitting the final paper to the conference organizers, the authors agree to allow the conference organizers to have non-exclusive use of the material for publication in the conference proceedings.

Authors are actively encouraged to develop their papers for journal publication after the conference. Several tracks have arranged fast-track submission to journals; please check the track descriptions on the website.

The ECIS 2015 Programme Chairs

Research Paper Chairs

Richard Baskerville
Shirley Gregor
Jos van Hillegersberg
Robert Winter

Research-in-Progress Chairs

Wil van der Aalst
Tatiana Bouzdine-Chameeva
Karlheinz Kautz
Ferdinando Pennarola

Conference Chairs
